Vulcanizing Press Series Flatbag Lico

by ICE-Trade ®

The WAGENER FLATBAG Vulcanizer combines the conventional heating system with the FLATBAG pressure system.

All advantages at a glance :

- low assembly height
- new generation of water bags
- adjustable and pressure level
- proven conventional heating platens
- automatic temperature control
- super-light aluminum traverse profiles

Components

FLATBAG-Vulcanizers consist of the following components:

- 1 pair of conventional heating platens
- 1 switch box for automatic temperature control
- rectangular traverse profiles made of aluminum alloy
- traction bolts with left- and right-hand thread including holding plates
- spacing rails for easy assembly
- 1 FLATBAG pressure bag as deflection compensator, including connecting hose
- 3 insulation- /pressure- distribution plates made of impregnated laminated wood
- 1 motor pump for water/glycol-mixture
- 1 digital thermometer GTH 1100/2

Available press shapes:
rectangular
rhombic 16° 42'
rhombic 22°

Voltages:
230 V single-phase A.C.
230 V three-phase A.C.
400 V three-phase A.C.
500 V three-phase A.C.
other voltages upon request
