

## ICE-Trade Plasto – Ceram liners

ICE-Trade Plasto – Ceram liners combines the sliding wear resistance of ceramic ( $Al_2O_3$ ) with the elasticity and proven impact resistance of rubber.

Standard IT Plasto – Ceram comes with 4 mm rubber with a tacky back and 4 or 6 mm thick ceramic tiles. The plate dimension is 500 x 500 mm and the tiles are 20 x 20 mm.

On request the following executions are possible :

- rubber thickness till 40 mm with a tacky or steel back
- ceramic thickness till 50 mm
- instead the tacky back, a steel plate, thickness 3 or 5 mm with stud welded bolts
- plate size 500 x 500 mm with ceramic tiles 10 x 10 mm and 2 mm thickness
- made to size plates and ceramic tiles

Applications :

- transfer chutes
- liner at discharge
- side skirt liner
- pulley and roller lagging
